"FapTurbo Evolution"

Limited Edition

The #1 Scalper Taken To The Next Level

Special Report For The Serious Forex Trader

Dear Forex Trader,

We decided to write this special report since we truly believe a great opportunity is about to present itself for a select group of traders.

Many of those reading this report already know about or already purchased FapTurbo since it was launched about 8 months ago.

Indeed, it has proven to be the most popular Forex robot in existence!

But why is FapTurbo so popular? *Why are so many people trading it*?

Quite simple...

Because it is an extraordinarily profitable robot! We genuinely only need the fingers of one hand to count how many truly good Forex robots there are in the marketplace right now...and yes, at the top of the list are Forex Megadroid and FapTurbo.

Both Forex Megadroid and FapTurbo are very accurate, very profitable and have withstood the test of time.

However, they are geared towards different types of traders.

Forex Megadroid is well suited to the trader who does not mind less action in order to wait for those very accurate and safe trading opportunities.

FapTurbo is geared towards the more aggressive trader who wants to see more action on his or her account (since it trades almost every night).

Actually, many traders use both robots on their accounts. They simply complement each other very well!

Both John and I hold the FapTurbo team in very high regard. With so much B.S. going around in the Forex business, it is certainly hard to come across a professional team that really produces great products and works very hard on Research & Development.

Make no mistake...<u>these guys spend A LOT of time, effort and money in order to produce top notch Forex robots</u>.

We are not talking about the average Joe who knows nothing about Forex and just wants to make a quick buck selling some B.S. Forex robot....

We are talking about true professionals developing a real brand and investing all they have to <u>*improve that brand*</u> as time goes by.

So…why this report and why now?

Well, as I said at the beginning of this report, a great opportunity is coming to a very small group of traders.

Here it goes...

*The FapTurbo Team Is About To Establish A New Standard In The Forex Business...Something **<u>NEVER</u>** Seen Before.*

For the very first time, and after almost 8 months, these guys have managed to move the game one notch UP....

If you thought that the old FapTurbo revolutionized the Forex industry, wait until you see what’s in store now!

“FapTurbo Evolution” – Limited Edition (The Ultimate Forex Robot For The <u>Serious</u> Trader)

The original version of FapTurbo took the industry by storm for one simple reason: it was the very first robot that ACTUALLY produced profit after profit...day after day, with live (real money) trading accounts.

The very first scalper that was accurate enough to truly double deposits - month after month.

Thousands and thousands of people made an obscene amount of money with FapTurbo and we can certainly say that it changed the lives of many people.

But more than that...<u>it established a high standard in the Forex business</u>.

But let’s understand why FapTurbo was (and is) such a good robot...it’s not enough that something makes money for you...in trading you have to understand WHY it’s making money for you!

Informed decisions are the #1 element that will allow you to truly be successful when it comes to trading.

Ok… let’s start ☺

FapTurbo is a scalper, as is *Forex Megadroid*.

Both robots aim to do one single thing:

<u>Find very good risk/reward opportunities within the 24 hour trading session and “grab” a small number of pips (generally, not more than 10 pips)</u>.

Fast entry...fast exit...fast profit - many times. That’s the job of a real and accurate scalper.

Now...no matter what you have read or seen (I particularly mention this because of all the hype and B.S. we are now used to seeing on the Internet!) creating an **ACCURATE** and **CONSISTENT** scalping robot is **H A R D**!

You noticed I underlined the word consistent...

In trading, it's all about consistency...especially in Forex trading.

Why especially in Forex trading? Well, I am not sure what financial instruments you have traded in the past or are trading at present (if any)...

However, if you have any trading experience then you know one thing: the Forex market has many advantages and disadvantages over other markets ...and one of those disadvantages is that it's not very predictable.

You see...in order to create a very profitable trading strategy that can pass the test of time, you have to make sure it performs well under different market conditions.

Now, this is the "problem" when it comes to Forex - market conditions and behavior change very quickly. By the time you notice a change, it's probably too late.

The Inability Of 99% Of Forex Robots To Adapt To Changing Market Conditions Is The #1 Contributing Factor To Their Failure...

That is exactly the reason why you buy most Forex robots and you do not make money.

Let me explain.

The scenario is quite common: you visit a Forex robot's sales page... you see some great results...you buy the robot hoping you will achieve the same results.

And what happens next?

Well...either you never get round to trading the robot, or you do and end up losing your hard earned dollars.

What went wrong? I mean, the robot seemed to perform well in the past. It had nice back-tested results...nice live trading accounts proof...so what's up?

You probably know the answer but, if not, please allow me...

The robot you just bought had a flaw which **most** robots have. It either performs well in a trending or ranging market. Once conditions change from trending to ranging (or vice versa)...GAME OVER!

It's as simple as that. Nothing more, nothing less. Forget about all the B.S. you are being fed from FX robot vendors. Please, be smarter than that.

So...consistent performance is obviously a key feature when it comes to making money from trading Forex with a robot (or for that matter, trading any type of system – automated or not).

FapTurbo's Supremacy Over *99%* Of Forex Robots Is Reflected In Its Accurate Scalping Consistency...

Both John and I are very unforgiving people when it comes to Forex robots. We have been around for so long and have seen so much that it takes more than fancy marketing to impress us.

Well, FapTurbo has impressed us....

Yes, they are our direct competitors, but so what?

They shall get the credit they deserve and Forex traders shall have the opportunity to profit not just from one robot (Forex Megadroid) but from any quality robot that is highly profitable and consistent.

Now...it is important for us that you understand the mechanics behind *FapTurbo's* consistency and profitability. Again, informed trading decisions (I will re-iterate that point over and over again since it is what separates rookies from those who understand what they are doing).

FapTurbo is able to achieve account doubling profitability because:

1. It trades during low volatility periods (Asian session) and hence is able to count on more stable and constant market behavior which, most of the time, is "ranging market" behavior. In other words, **PREDICTABLE** market behavior.

2. It targets currency pairs that have proven over time to show uniform movement characteristics during the Asian session.

3. It accurately extracts a small number of pips (fast entry, fast exit) from the market.

4. It has an inbuilt risk control mechanism which allows it to **ACCURATELY** decide when to stop trading or get out of a trade when market conditions change (yes, even during the Asian session the ranging market conditions change often).

The developers of FapTurbo managed to nail down each of these areas quite well...they managed to establish a new frontier in Forex trading just 8 months ago.

So...all this begs the following questions:

Was there anything they missed?

Was there anything they miscalculated?

The answer to both of these questions is YES!

No need to beat around the bush here...I'll just say it:

The *FapTurbo* team wanted everyone to make a lot of money. Their true intention was for people to grow their trading accounts every single day...

And do you know what?...they achieved that objective for quite some time. Many, MANY people doubled, tripled and even quadrupled their deposits.

Now, let me tell you something that really bothers us...

Many people are still skeptical regarding the *FapTurbo* team's intentions...some say that they are just marketers aiming for a quick buck.

Well, if that was true, we would be THE FIRST ones to say it out loud!

But it's not...far from it.

The simple fact remains that *if* they had just kept the robot for themselves, trading their own accounts...not releasing the robot to the general public, they would have made at least 10 times more money than by selling it.

Please let me expand on this point since it's of crucial importance.

The FapTurbo team wanted to keep everyone happy. They wanted to create new fortunes for Forex traders...

They wanted to make sure that everyone got a piece of the cake, so to speak ☺

Do you know the saying "*you are too good for your own sake*?"

Well, that's exactly what happened. They were too good to everyone and that was exactly their miscalculation.

They could never have imagined that so many people would join the FapTurbo family...that so many people would trade the robot on live accounts.

But that's what happened...and this is what started to cause problems.

Why problems? Well, because not many brokers were happy with so many people making so much money.

The simple fact remains that MOST Forex brokers make their money when **YOU** lose yours!

I want you to pay VERY close attention here since the following piece of information is so simple but yet so overlooked:

As A Rule Of Thumb , A Truly GOOD Forex Broker Makes Its Money From Spread And/Or Commissions...An Unethical Broker Makes Its Money From Trading Against YOU...

And before you say "*What...commissions???*"....think twice.

You are WAY better off paying commissions but getting good executions, good spreads, trade transparency, limited slippage, no manipulations, etc. than avoiding commissions but getting the opposite (and/or traded against).

STAY CLEAR OF BROKERS WHO CONSTANTLY TRADE AGAINST YOU!

These brokers have one objective in mind: that you lose your deposit! Whatever you lose, they gain. If you had ***USD $1,000*** in your trading account and you lost that amount, they most probably earned that much, or quite close to it.

Generally speaking, brokers who have a dealing desk and execute trades through it will frequently take positions against you...and you know the rest ☺

Always try to trade with a true ECN broker with no dealing desk executions.

So...

As previously explained, too many traders were trading *FapTurbo* and too many brokers started to lose money.

<u>The result</u>: many brokers started widening spreads, increasing slippage, not accepting new *FapTurbo* accounts, closing existing *FapTurbo* accounts, etc...

Although the robot was still a top notch robot, many "*bucket shop*" brokers did what they thought necessary so that THEY could keep making money rather than their clients.

And, by the way, when I say "bucket shop", I don't only mean small brokers...I also mean some of the BIG brokers who still run their businesses like true "bucket shops"...thinking only about themselves rather than about the clients who trust them with their funds!

I'm sorry for being so harsh about this point but, after being in this business for so long and having seen so much, it does get to you...

And as a side note...

That is precisely why we created the "*Broker Buster*" mechanism in *Forex Megadroid*...we wanted the robot to be invisible to brokers...we wanted to do as much as humanly possible to prevent the "bucket shop" brokers from interfering with its profitable trading.

Anyway...

That was the "fault" of the FapTurbo team...<u>if you can even call it a "fault" to be honest</u>. Allowing too many copies into the market created a situation where you had to search for a decent broker to trade it with.

The Solution: A New Frontier…A Once In A Lifetime Opportunity…*Long Term, Steady Profits*!

FapTurbo Evolution is the FapTurbo team's answer to what has been going on with the FapTurbo standard edition over the past 8 months.

You see...once the development team noticed how many brokers were starting to create problems for FapTurbo users by manipulating things, they began searching for a solution...an alternative.

The alternative had to take care of all the "problems" the standard edition of FapTurbo had.

If you read this report fully then you understand that the problems FapTurbo had were NOT due to the robot itself but to the brokers people traded it with...

The robot itself is still a masterpiece...the strategy it contains is still a money making machine. So...

The solution consisted in finding a top notch broker that:

A. Is *a true ECN broker*

B. *Has no dealing desk execution*

C. *Has VERY Low spreads during the Asian session*

D. *Provides low (or no) slippage trading conditions*

E. *Does not care if you make money*

F. *Has a huge liquidity pool*

G. *Provides complete trade transparency*

H. *Is well established and reputable*

With such a broker, FapTurbo could be traded flawlessly and its true profitability could be exploited consistently and safely. Again...I stress the word “consistently”.

After searching for the most FapTurbo-compatible Forex broker, a decision was made.

The FapTurbo team selected a broker who met all of the 8 criteria laid down above (*A* through *H*).

Now...there were two issues to solve when it came to trading FapTurbo with their selected broker.

First, the FapTurbo robot was originally designed to work with Metatrader but the selected broker only offered its own, proprietary trading platform, not Metatrader so a solution had to be created.

Second, the broker stipulates a minimum account opening deposit requirement of *US $50,000*.

So...let's start with the trading platform issue....

In order for FapTurbo to be able to automatically trade with the proprietary platform, the FapTurbo technical team had to re-engineer the robot from the ground up... the result was **FapTurbo Evolution**!

But they didn’t stop there... they realized that Evolution users would almost certainly have other MetaTrader EAs that they would like to trade with this broker so they took things a stage further and, after investing a lot of time and effort, created what is called a “bridge” between Metatrader and the broker's proprietary system.

In simple terms...a program that communicates between Metatrader and the target platform to replicate trade instructions.

This means that for other EAs, you install the “bridge”, fire up MetaTrader4 and it automatically connects your specified robots to the new broker's platform, allowing them to trade.

What this means is that other robots can be traded on an MT4 demo (or live) account and signals from that MT4 account are directly transmitted to your **LIVE** trading account with the new broker.

It sounds a bit complicated doesn't it? Well...trust me, <u>all this actually takes just a few minutes to set up</u>!

So...the solution for the selected broker's platform took two forms… a completely re-engineered robot (FapTurbo Evolution) which trades directly on the proprietary system plus an option to trade other robots only designed for MetaTrader4.

All of this came together **very successfully** - in a moment you will see just how successfully!

Now to the second issue...the **US $50,000** minimum account opening requirement.

Pay close attention here because you will absolutely LOVE this part!

The FapTurbo team knew that US $50,000 is more money than most people can afford to deposit.

So what did they do? Well, they waited until the broker came out with a special, limited time, account requirement reduction before they launched FapTurbo Evolution.

For A Limited Time, They Are Allowing An Account To Be Opened With A Minimum Of US $10,000 Instead Of The Normal US $50,000!

Note: This reduction in the minimum account opening requirement has absolutely nothing to do with the FapTurbo Evolution launch.

Now...what does this mean?

Simple...that small traders finally have access to the best broker around...they finally have access to that <u>unfair advantage</u> that the “big dogs” have enjoyed!

Ok...now to the part that most readers have been waiting for...

...**<u>PROOF of performance</u>**!

FapTurbo Evolution Account Proofs

The following are details of 4 accounts from 4 different beta testers of FapTurbo Evolution.

Each of these 4 people agreed to risk their own money in order to test the new robot and its profitability.

They are independent testers and their complete account details showing every trade taken will be presented on the FapTurbo Evolution website soon.

Beta Tester #1

Deposit: USD $30,000
Date Started Trading: 17 June 09
Balance as of 09 July 09: **USD $36,814 NET**

Beta Tester #2

Deposit: USD $10,000
Date Started Trading: 09 June 09
Balance as of 09 July 09: **USD $13,080.13 NET**

Beta Tester #3

Deposit: USD $15,000
Date Started Trading: 10 June 09
Balance as of 09 July 09: **USD $19,446 NET**

Beta Tester #4

Deposit: USD $10,000
Date Started Trading: 11 June 09
Balance as of 09 July 09: **USD $11,620 NET**

SPECIAL NOTE: Beta tester #4 did not use the parameters recommended by the FapTurbo team when he started trading. He later changed them and hence his account growth was slower.

SPECIAL BONUS FROM THE FOREX MEGADROID TEAM

For the past 3 months we have been working very hard on a new version of Forex Megadroid.

The success of the original Forex Megadroid was incredible and the on-going feedback we have been receiving from our clients has been impressive!

Both John and I are proud of the fact we have created a consistently profitable Forex robot...but MORE than that...

What makes our day is that so many people from all parts of the world are consistently making money with the robot.

However, the original Forex Megadroid version was just the beginning...

We have just finished creating **Forex Megadroid Pro** and all we can say is that if you thought the original version was good....just wait and see what's in store with the ***Pro*** version of the robot!

Forex Megadroid Pro Is A Multi-Currency Robot That Trades 3 Pairs Simultaneously With Incredible Precision And Profitability...

Unlike the original version of the robot (which trades 1 pair), Forex Megadroid Pro Edition scalps profit after profit from 3 pairs.

This is going to be the very first multi-currency robot on the market that scalps around the clock (not only Asian sessions) with laser accuracy.

Forex Megadroid Pro Edition is about to be released to a limited number of people for just **US $699** however...

...the FapTurbo Evolution launch is a very special occasion and, for that reason, we decided that we wanted to provide an equally special bonus to our subscribers who buy *FapTurbo Evolution* via our link.

Here is what we did:

If You Decide To Buy FapTurbo Evolution Through Our Link, We Will Immediately Send To You The Complete Forex Megadroid Pro Robot!

You will not pay a single cent for Forex Megadroid Pro...you will be getting a top-notch product that people will soon pay **US $699** for.

Once FapTurbo Evolution goes live, we will send you an email with the correct link to use for purchasing the FapTurbo Evolution system.

If for some reason you do not get that email (spam filters, non-delivery, etc.), you can also use the following link which will be activated the moment that FapTurbo Evolution becomes available:

http://www.forex-megadroid.com/Fap-Bonus.html

As soon as you have completed your FapTurbo Evolution purchase, our server will **automatically** email you with download details for your bonus copy of Forex Megadroid Pro.

Regards,

Albert & John

FOREX DISCLAIMER

FOREX Risk Disclosure

Please read this carefully. If you don't understand any of the information provided in this disclosure or if you have any questions, please contact me. The National Futures Association (NFA) and CFTC (Commodity Futures Trading Commission), the regulatory agencies for the FOREX and futures market in the United States, require that customers be informed about potential risks in the FOREX market (see the information below).

Risks Associated with FOREX and Trading

Trading foreign currencies is a challenging and potentially profitable opportunity for educated and experienced investors. However, before deciding to participate in the FOREX market, you should carefully consider your investment objectives, level of experience and risk appetite. Most importantly, do not invest money you cannot afford to lose.

There is considerable exposure to risk in any foreign exchange transaction. Any transaction involving currencies involves risks including, but not limited to, the potential for changing political and/or economic conditions that may substantially affect the price or liquidity of a currency.

Moreover, the leveraged nature of FOREX trading means that any market movement will have an equally proportional effect on your deposited funds. This may work against you as well as for you. The possibility exists that you could sustain a total loss of initial margin funds and be required to deposit additional funds to maintain your position. If you fail to meet any margin call within the time prescribed, your position will be liquidated and you will be responsible for any resulting losses. Investors may lower their exposure to risk by employing risk-reducing strategies such as 'stop-loss' or 'limit' orders.

There are also risks associated with utilizing an internet-based deal execution software application including, but not limited, to the failure of hardware and software.

Trading foreign exchange on margin carries a high level of risk, and may not be suitable for all investors. The high degree of leverage can work against you as well as for you. Before deciding to invest in foreign exchange you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial investment and therefore you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with foreign exchange trading, and seek advice from an independent financial advisor if you have any doubts.

Profit and Loss Potential

In any market where a potential for profit exists, there exists also a risk of loss. None of the information on money grid methodology nor any information or education provided to the client by any means assures that the client will make money in the FOREX market. The information contained in this document does not constitute investment advice. I will not accept liability for any loss or damage, including without limitation to, any loss of profit, which may arise directly or indirectly from use of or reliance on such information.

Benefits and Risks of Leverage

Even though the FOREX market offers traders the ability to use a high degree of leverage, trading with high leverage may increase the losses suffered. Please use caution when using leverage in trading or investing.

Hypothetical Performance or Back-Tested Results

Hypothetical performance results have many inherent limitations. No representation is being made that any account will or is likely to achieve profits or losses similar to those inferred or shown. There are frequently sharp differences between hypothetical performance results & the actual results subsequently achieved by a particular trading program. One of the limitations of hypothetical performance results is they are generally prepared with the benefit of hind sight. In addition, hypothetical trading does not involve financial risk & no hypothetical trading record can completely account for the impact of financial risk in actual trading. The ability to withstand losses or adhere to a particular trading program in spite of trading losses are material points which can adversely affect actual trading results. There are many other factors related to the markets in general or to the implementation of a specific trading program which cannot be fully accounted for in the reparation of hypothetical performance results – all of which can adversely affect actual trading results.
